

Cleanliness Counts for the Missions!

Count the number of showers, tubs and sinks in your house and fill in the number on the worksheet. How would your life be different with one more? One less? None at all?

Grades K-3 discuss and draw results.

Grades 4-8 write an essay, prayer, or draw a picture of your life without indoor plumbing.

Can you sacrifice ten cents or more for every shower, tub and sink in your house so that children in the missions might have access to clean water?
